

No-Scalpel Vasectomy Instructions

Dear Patient,

As per our conversation, we have scheduled you for your No-Scalpel Vasectomy on with
Labell

Dr. Perlow. He will discuss the vasectomy in detail with you and answer all your questions prior to the procedure. It is recommended that you come with someone to drive you home. We request that you make the following preparation prior to your visit:

(1) SHAVE YOUR ENTIRE SCROTUM (THE SAC CONTAINING THE TESTICLES) BEFORE COMING TO THE OFFICE. PLEASE SHAVE WELL FOR YOUR OWN BENEFIT. SHAVE THE ENTIRE SCROTUM (INCLUDING THE SIDES) UP TO THE TOP SIDE OF YOUR PENIS. SHOWER BEFORE COMING TO THE OFFICE.

(2) Bring an athletic supporter (“jock strap”) with you to wear home after the procedure.

(3) The vasectomy is done with the aid of a local anesthetic called “Xylocaine” which is similar chemically to the “Novocaine” which many dentists have used. If you have a SENSITIVITY OR ALLERGY to such local anesthetics, you must let us know prior to your procedure.

Should you have any further questions, please feel free to contact us prior to your visit.

Sincerely yours,

Patient Care Coordinator
